

# PARIS CERAMICS

**Second Face Tumbled Bourgogne Limestone-** From the Burgundy region of France, this is an extremely hard wearing stone. Cut from the secondary surfaces of our Antique Dalle de Bourgogne, we then tumble the pieces of stone giving the newly exposed surfaces the texture and look of years of continual use. Ranging in color from light beige to tan and silvery grey.

The Second Face Tumbled Bourgogne Limestones featured in this picture are 10" squares, hexagons and brick shapes are also available.
